

INSTRON® STRUCTURAL TESTING SYSTEMS

- **IST** is a global partner providing solutions for the physical testing of automotive structures and components including application consultancy, design and manufacture of systems and equipment.
- **IST** hardware ranges from simple component tests rigs through to state-of-the-art vehicle simulators including the digital control electronic Labtronic and iterative control software for unparalleled simulation accuracy.
- **IST's** modular component concept allows the configuration of a broad range of test systems for Durability, NVH, Passive Safety and Performance Testing.
- The **Durability Alliance** is a strategic partnership of IST, Kistler Instrumente AG, LMS International and Team Corporation integrating products and services to provide unique solutions which help to products to market faster.

The Durability Alliance
